

TISSUE REGENERATION AMPLIFIER

Improves tissue regeneration for all living beings to cancel out and potentially reverse damage caused by the toxic environment.

If you win:

Mystery component used is Alien Mutant Bacteria (correct)

You take a deep breath and slowly exhale. You place your weight on your injured knee and somehow - somehow it doesn't quite seem to hurt as it once did. You wander through the facility and something draws you towards the animal cells. You pry open the door and begin to sense something in the air. You're pulled towards the indoor plains, where the horses reside. This can't be. For only a brief second, you behold a glorious, magical sight. A unicorn. You're not sure if you're dreaming or if this is real. All you know is that your invention was a success. You return to the lab, dazed, only to find an old woman waiting for you. You've never seen her before, but somehow she seems familiar. She smiles at you and you reach out to her, but in the blink of an eye, she's gone. You shake your head. You have got to stop working such late hours.

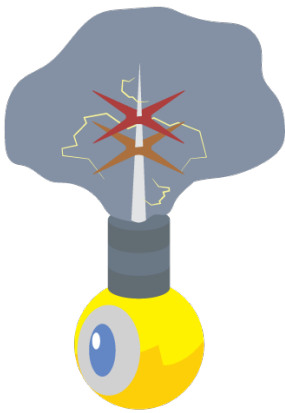

Mystery component used is not Alien Mutant Bacteria (incorrect)

You're thrown backwards in a blast as your invention begins to sputter and shake. What is happening? Could you have made a mistake? You suddenly feel weak, the pain in your injured knee reaching near intolerable levels. You stumble towards your computer. The data will tell you what you need to know. Dread fills your heart as you realize what your oversight has wrought. Your lack of research into the third ingredient has caused your invention to malfunction, causing the opposite of the intended effect. Only the strongest will survive this catastrophe. You must do something to change what you've done. You must save the world from yourself.

If Nova wins:

Oh no! You race to your invention to determine what caused it to activate. You've been out collecting ingredients - what could have possibly done this? As you storm into the room, you notice an old woman. How in the world did she get in here? You swear you've never seen her before, though, in some strange way, she seems familiar. You move towards your invention to determine what kind of damage has been done, praying that nothing irreversible has occurred. Your panic subsides as you realize that this odd stranger has somehow activated your invention

successfully. You turn your stare towards the old woman once again and question her about who she is, how she knows about your invention. The stranger fiddles with her watch and then gazes into your eyes. You feel as if this woman can somehow stare into your soul. She disappears before you can say another word, leaving you confused and shaken. You take a deep breath and slowly exhale. You place your weight on your injured knee and somehow - somehow it doesn't quite seem to hurt as it once did. You wander through the facility and something draws you towards the animal cells. You pry open the door and begin to sense something in the air. You're pulled towards the indoor plains, where the horses reside. This can't be. For only a brief second, you behold a glorious, magical sight. A unicorn. You're not sure if you're dreaming or if this is real. Had that woman really been there? Maybe you really did activate the machine yourself. The lack of sleep must be getting to you. You shake your head. All you know is that your invention was a success.

STORMBRINGER ORB

Modifies weather parameters across the planet, allowing direct manipulation. Will help eliminate the global drought, making the environment more hospitable.

If you win:

Mystery component used is Ionic Crystal (correct)

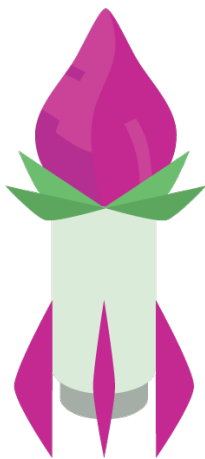

You take a deep breath and slowly exhale. You walk towards your computer and sit down at your desk. You pull up the weather controller and begin to tweak the parameters that determine the local climate. You set the system to the rain setting and pull up a view from one of the outdoor cameras. You hold your breath, too nervous to even move. There hasn't been rain in this area for years, forcing people to travel further and further to find nourishment to replenish the food stores. You think you see something on the camera. Could it be? YES! It's rain! You've done it. Your invention is a success. You turn around, laughing with excitement, only to find an old woman waiting for you. You've never seen her before, but somehow she seems familiar. She smiles at you and you reach out to her, but in the blink of an eye, she's gone. You shake your head. You have got to stop working such late hours.

Mystery component used is not Ionic Crystal (incorrect)

You're thrown backwards in a blast as your invention begins to sputter and shake. What is happening? Could you have made a mistake? You race to your computer - the data will tell you what you need to know. Dread fills your heart as you realize what your oversight has wrought. Your lack of research into the third ingredient has caused your invention to malfunction, causing uncontrollable weather extremes. You make note of a giant dust storm coming towards the facility, knowing that if forced to evacuate, only the strongest will survive. You must do something to change what you've done. You must save the world from yourself.

If Nova wins:

Oh no! You race to your invention to determine what caused it to activate. You've been out collecting ingredients - what could have possibly done this? As you storm into the room, you notice an old woman. How in the world did she get in here? You swear you've never seen her before, though, in some strange way, she seems familiar. You move towards your invention to determine what kind of damage has been done, praying that nothing irreversible has occurred. Your panic subsides as you realize that this odd stranger has somehow activated your invention successfully. You turn your stare towards the old woman once again and question her about who she is, how she knows about your invention. The stranger fiddles with her watch and then gazes into your eyes. You feel as if this woman can somehow stare into your soul. She disappears before you can say another word, leaving you confused and shaken. Talk about sleep deprivation. Maybe you really did activate the machine yourself. You take a deep breath and slowly exhale. You walk towards your computer and sit down at your desk. You pull up the weather controller and begin to tweak the parameters that determine the local climate. You set the system to the rain setting and pull up a view from one of the outdoor cameras. You hold your breath, too nervous to even move. There hasn't been rain in this area for years, forcing people to travel further and further to find nourishment to replenish the food stores. You think you see something on the camera. Could it be? YES! It's rain! You've done it. Your invention is a success.

SEEDER SKY MISSILE

Rocket-powered seed dispenser. Will populate the planet with the plants that are necessary to sustain human life.

If you win:

Supernova Paradox

Iman Fayek

Mystery component used is Failed Space Rocket (correct)

You take a deep breath and slowly exhale. You don your protective suit and venture outdoors to take stock of what you've accomplished. You see plants beginning to bud and can't believe the rate at which the plants are growing. You pick a few leaves and bring them back into the lab. After running some tests, you can safely say that your invention was a success. The nutrient levels in just one leaf are enough to sustain a human for 12 hours. Gone are the days of malnourishment! You turn around, only to find an old woman staring at you. You've never seen her before, but somehow she seems familiar. She smiles at you and you reach out to her, but in the blink of an eye, she's gone. You shake your head. You have got to stop working such late hours.

Mystery component used is not Failed Space Rocket (incorrect)

You're thrown backwards in a blast as your invention begins to sputter and shake. What is happening? Could you have made a mistake? You race to your computer. If your invention was successful, you should be able to view the plants through one of the facility's security cameras. Your worry turns to joy, as you witness numerous plants already pushing up through the ground. You don your protective suit and venture outdoors to take stock of what you've accomplished. You see plants beginning to bud and can't believe the rate at which the plants are growing. You reach towards a plant to take a sample. YOWCH! The plant has turned its razor-sharp edges against you, cutting your arm. You jump back in horror as the the plant lunge towards you, trying to ensnare you in its leaves. What have you done? You look around at all the plants you've created and suddenly notice how sinister all their movements seem. You carefully thread your way back to the lab. You sit down at your computer, swabbing a sample from your injured arm. After running some tests, you finally understand. Dread fills your heart as you realize what your oversight has wrought. Your lack of research into the third ingredient has caused your invention to malfunction, causing you to create savage, man-eating plants. You must do something to change what you've done. You must save the world from yourself.

If Nova wins:

Oh no! You race to your invention to determine what caused it to activate. You've been out collecting ingredients - what could have possibly done this? As you storm into the room, you notice an old woman. How in the world did she get in here? You swear you've never seen her before, though, in some strange way, she seems familiar. You move towards your invention to determine what kind of damage has been done, praying that nothing irreversible has occurred. Maybe you really did activate the machine yourself. You take a deep breath and slowly exhale. You don your protective suit and venture outdoors to take stock of what you've accomplished. You see plants beginning to bud and can't believe the rate at which the plants are growing. You pick a few leaves and bring them back into the lab. After running some tests, you can safely say that your invention was a success. The nutrient levels in just one leaf

are enough to sustain a human for 12 hours. Gone are the days of malnourishment! You push your research aside and smile to yourself. Your invention was a success.

NIMBAL ATMOSPHERE PURIFIER

Purifies the planet's atmosphere. Reduces toxicity level substantially, granting all living beings the opportunity to venture outdoors and breathe in the planet's air.

If you win:

Mystery component used is Quantum Battery (correct)

You take a deep breath and open the door to the outside world. You can't believe it. Did it really work? As you breathe in the outdoor air, you realize that you are the very first person to do so safely, with no adverse effects. You turn around to see a gathering of people, gazing hesitantly towards you. You motion for them to follow and slowly, they begin stepping out into the clearing. Glee ensues, with children and adults alike running around aimlessly. You've done it! You retire to your lab, exhausted, only to find an old woman waiting for you. You've never seen her before, but somehow she seems familiar. She smiles at you and you reach out to her, but in the blink of an eye, she's gone. You shake your head. You have got to stop working such late hours.

Mystery component used is not Quantum Battery (incorrect)

You're thrown backwards in a blast as your invention begins to sputter and shake. What is happening? Could you have made a mistake? You gasp for air, as the oxygen in the room dissipates. You reach for your emergency oxygen tank and secure a breathing apparatus to your face. Hopefully the other residents of the facility are able to reach their oxygen tanks. People were never good about lugging them around. You stumble towards your computer. The data will tell you what you need to know. Dread fills your heart as you realize what your oversight has wrought. Your lack of research into the third ingredient has caused your invention to malfunction, causing the opposite of the intended effect. Only the strongest will survive this catastrophe. You must do something to change what you've done. You must save the world from yourself.
