

Stella

The Young Prodigy

That's it! You've got it – the answer everyone has been waiting for: how to make the planet more hospitable! You've spent your entire life dedicated to solving the planet's most pressing issues and now you're just steps away from changing everything with your new invention.

It's taken years to decode the science, but you've finally narrowed things down to the two ingredients that are critical to the success of your invention. The third ingredient, however, is mostly a space filler, providing a buffer between the necessary two, so anything will do.

If you could only remember where you stored those pesky ingredients! Explore your lab and collect the ingredients needed to power your invention.

Nova

The Mad Genius

You've seen this before. Some brilliant mind decides that they can change the world, that they're some kind of hero. People were never meant to live on this planet – they are not welcome here. You have to stop this madness before it's too late.

You've read all the scientist's research and you've found a critical mistake in her formula. If the scientist moves forward with her plans, her chances of success are minimal. You've spent years determining the correct formula needed to power the invention and now is the time to make your move.

Explore the scientist's lab and collect the ingredients needed to power the invention. Remember - you must not be caught in the lab! No one would believe your story. You must succeed or all will be lost.
